
KINESIOLOGY

The Kinesiology Department supports the mission of the college by preparing students along their pathways to reach degree, transfer and career goals in an environment of academic excellence. The Kinesiology Department courses meet the West Valley College associate's degree requirements. Most of the courses also meet the transfer degree requirement for a bachelor's degree at CSU and most other four-year institutions. Kinesiology courses provide students the opportunity to prepare to transfer in degree programs in Physical Education and Kinesiology. Students can earn an associate's degree in Kinesiology preparing them for advanced degrees at four-year institutions. The department provides pathways for student-athletes to participate in intercollegiate sports. The department promotes student access with distance learning options.
