General college course reflection questions

Course: answered

Reflection questions for use by course:

As a result of your review of student assessments, what might you add/modify to the assessment to improve student learning and student experience (e.g., teaching methods, course content, delivery methods, assignments and activities)?

presented during the first month of the semester, but performed exceptionally well well during the final three months of the semester. This suggests that it is very important for students to have hands-on activities to reinforce their qualitative and quantitative reasoning skills.

As a result of course assessment data, what changes, if any, would you like to make to improve SLOs and the overall student experience?

Continuing on the approval of the Physical Sciences budget request for 2018-2019, we plan to reduce the number of equipment in our labs and incorporate more hands-on laboratory instructional activities into this course.

Score total: 14 16 11 6 4 6
